

## **PREFACE**

The Core Economic Indicators of Thailand 2008 is the sixth publication of its series of the National Statistical Office (NSO). The objective of the publication is to collect indicators and indices which are from censuses/ surveys conducted by the NSO and from other line agencies. The indicators and indices are classified into groups in order to be convenient for users to study, monitor and analyse the tendency of economy, including to evaluate the policy and planning development implementation.

The NSO would like to thank the agencies concerned for their contributions and hope that the publication would be of some benefit to the users.
