Benefits of this survey to the Thai people

Data obtained would be used by public and private sectors for appropriate policy formulation on reproductive health, such as;

- Public advocacy on reproductive health to promote understanding and proper prevention ie. family planning and antenatal care
- Service management for the people to equally and easily access to reproductive health service
- For study and understanding regarding reproductive health eg preventing pregnancy, preventing infectious of reproductive organ
- For promoting 6-month breast feeding, for benefits in nutrition and child development

**Section 1 Household members' characteristics**

Ask women aged 15-59 years and men aged 15-24 years

No. in order	Name-Surname	Result of enumeration of person	Relation to head of household	Sex	Age	Religion	Marital status
The last No. must equal to the number of household members at the cover page (item 9+item11)	Please record everyone in order <b>1.Women aged 15-59 years</b> from elder to younger <b>2.Men aged 15-24 years</b> from elder to younger  <b>every person</b>	Record code Enumerated (answer on one's own). 1 <b>(Go to next col.)</b> Fail to enumerate (3 visits could not meet respondent)... 2 <b>(Stop an interview)</b>	Record code Household head..... 1 Spouse..... 2 Unmarried child..... 3 Married child..... 4 Son/daughter in law. 5 Grandchild..... 6 Parent/spouse's parent..... 7 Relatives..... 8 Non-relative resident and servant..... 9	Record code Male..... 1 Female..... 2	Record age in complete year	Record code Buddhism..... 1 Islam..... 2 Christianity... 3 Other (specify).... 4	Record code Single..... 1 Married..... 2 Widowed..... 3 Divorced..... 4 Seperated..... 5 Ever married with unknown status. 6
